

How are we different ?

NEXT

All-in-one platform

Bigbuddy Studio allows users to record, edit, download, and publish their videos all in one place. This eliminates the need to switch between different tools or platforms to complete these tasks, saving users time and effort.

AI-powered video editing

A semi-transparent background illustration shows two people dancing. One person is in the foreground, wearing a red tank top and dark pants, captured in a dynamic pose. Behind them, another person is partially visible, also in motion. The background is a light purple color.

Bigbuddy Studio's AI technology can automatically edit your videos in less than 5 minutes. This feature can save users a lot of time and effort that would otherwise be spent on manual video editing.

No green screen required

Bigbuddy Studio allows users to record videos without requiring an additional green screen setup. This makes it easier and more accessible for users to create high-quality videos without having to invest in expensive equipment or setups.

NEXT

Overall, these features set Bigbuddy Studio apart from other video creation and editing platforms and provide users with a streamlined and efficient experience.
